

	- The dress wouldn't be comfortable to wear for a long period of time as it is not made with soft materials.	0	The point requires further development about why it would be uncomfortable.
	- The dress would be durable as its made of lasercut transparent elements and flexible tubing which are both long lasting and strong materials.	0	The delicate nature of the materials has not been considered properly by the candidate.
	- The dress would be worn better with plain accessories as it would compliment the dress effectively and not overpower it with bright and bold colours.	0	The comment about accessories is not relevant to this question.
	- The dress is very feminine and elegant and would be worn the most effectively on a female model.	0	The candidate has not justified why the dress is feminine and elegant within this comment thus no mark can be awarded.
