

Mrs Mills Biology/ S3 Brain Topic Tasks/Week beginning 18 January
Task One.

Do these look familiar? I used a story to link them together to help retain them in my long term memory.

Your set of pictures featured a chicken. The task is to write and email me as much of your story as you can recall. A picture of your work is fine. Lorraine.Mills@whec.edin.sch.uk

Task Two

Looking for differences or searching for similarities?

We don't all approach this in the same way. Look at the Spot the difference sheet.

The picture on the right contains 10 tiny differences. Write down any that you find and email me your answers.

Task Three

View the Invisible Animals power point. Write down the animal type or where you see it on each slide. Don't forget to send me your work.
