Bus	Capacity	Daily Rate												
 Mini-bus	12	£70												
 Standard	38	£300												
 Double	79	£615												
<p style="text-align: center;">Fact or Opinion</p> <p>It is important that we can recognise the difference between Fact and the opinions of others. Look at the sheet provided and see if you can work out what is fact and what is opinion. Underline the facts and circle the opinions. <i>Check your answers with the back of the sheet.</i></p>	<p style="text-align: center;">Numeracy and Mathematics – Displaying Data</p> <p>In this activity, you will look at the different ways to display data. The type of graph selected and the way it is used to display data can sometimes make data misleading. Find the activity later in the pack.</p>	<p style="text-align: center;">Social Studies</p> <p>Imagine that the closest park to your home was due to be changed into a windfarm. How would you feel? Write a balanced argument taking in the pros and cons and make sure to research how windfarms can affect people and animals that live near to them.</p>												

Listening and Talking

Create an Advert – Look at the adverts around you and on the TV. Note words and phrases which are used to persuade or influence you. Rehearse your own advert for an object of your choosing. *You could even record your advert.*

Puzzle - Missing Numbers

Can you fill in the missing numbers?
 CLUE: Look at the middle column: ? X 8 x ? = 80. To make 80 the 2 missing numbers must multiply to make 10 (as we know 8 x 10 = 80). What could these numbers be?

	+		x		=	20
+		x		-		
	x	8	x		=	48
-		x		+		
	x		-		=	38
=	=	=				
0	80	10				

Modern Foreign Languages

Turn your house into a **bilingual dictionary!** Use an online tool to translate the terms for things around your house. Use pieces of paper and tape (or sticky notes) to help teach

Week 3 Home Learning for 2nd level – Block C
Notes from Reading

What I think the book is about

What I think will happen in the book.

Questions I have about the book.

Fact or Opinion

Underline all of the facts in one colour and the opinions in another

Elephants

Elephants are amazing animals to study because they are the largest land mammals. The African elephant is bigger than the Asian elephant and is therefore more interesting.

Elephants are herbivore and eat food such as grasses, bark, fruit and roots. They use their trunks to pick food up and put it into their mouths. Sometimes, elephants will eat over 130kg of food each day so they are thought of as particularly greedy creatures!

The most fascinating part of an elephant is their trunk. They don't just use it to eat but to smell, breathe, drink and spray themselves with water.

Despite not being very pretty creatures, elephants are known to be very sensitive as there is evidence that they mourn when their friends or family die.

Answers

Fact or Opinion

Facts are underlined and the opinions are in bold.

Elephants

Elephants are amazing animals to study because they are the largest land mammals. The African elephant is bigger than the Asian elephant and is therefore more interesting.

Elephants are herbivore and eat food such as grasses, bark, fruit and roots. They use their trunks to pick food up and put it into their mouths. Sometimes, elephants will eat over 130kg of food each day so they are **thought of as particularly greedy creatures!**

The most fascinating part of an elephant is their trunk. They don't just use it to eat but to smell, breathe, drink and spray themselves with water.

Despite not being very pretty creatures, elephants are known to be very sensitive as there is evidence that they mourn when their friends or family die.

Story Explorer

Every story deserves a good map! Maps help us explore and when it comes to a good story we don't want to miss anything. Think about the maps you remember from children's books - The Hobbit, Lord of the Rings, Narnia, The Marauder's Map in Harry Potter or The Isle of Berk in How to Train Your Dragon. Maps can be really creative and show more than just locations and geographical features - they can bring all the elements of the story to life and show us what it might be like to explore them! The map could be of a whole world or just a small cityscape, depending on the setting. Choose a book you have read and enjoyed to use a focus for your map. If you like sharing stories with younger children, try creating a map of a well-known fairy tale such as Jack and the Beanstalk or Little Red Riding Hood.

Your map should include....

- key landmarks and physical features in the setting e.g. the school, the swamp, the dark tower,
- a map key that helps the reader identify specific places e.g.
- locations of characters

Make a list of all the things you would like to include on your map below

Now sketch out and label your map on a blank sheet of paper or use the grid sheet provided.

Edinburgh Learns @Home Week 3 Home Learning for 2nd level – Block C Visitor Guide

Stories are full of exciting places to go, things to do and people to meet (or maybe magical creatures!) or see. Think of a story setting from a story/book you know well. What are the things that make the setting exciting to explore?

You are going to design and write a Visitors Guide to your chosen setting. It can be a hand written leaflet or a website page (completed on SWAY, Powerpoint or Word).

When composing your Visitor Guide, include information on the following, using these subheadings. You can also add you own sub headings if you wish!

- **Location** - What kind of atmosphere does the place have? Scary, funny, exciting? Is the setting a 'real' place or fantasy, or a combination of both? Or is the setting historical?
- **Climate** - Is it a hot or cold place? Do visitors need to wear special clothes? They might need a costume! What will the weather be like? Maybe the story is set in space!
- **Transport** - How will visitors get there? If it's a different place in time, they might need a time machine. If the story is set in space, they might need a rocket. Or maybe they'll travel by horse and cart! Is there a special way to explore the world they're visiting? Maybe they'll have to travel by umbrella!
- **Attractions** - Are there different attractions that could be visited? For example, if you went to Hogwarts you might like to visit Hogsmeade and the Shrieking Shack. Or if you went to Dream Country you might want to see the dream jars. Is there anywhere that should be avoided if it's dangerous?
- **Things to do** - What can they do while they're there? Ride a dragon with Horrendous Hiccup or go on a motorbike with Gangsta Granny? Or maybe race through the jungle with Mowgli and Baloo the Bear?
- **Food** - What food can they expect to eat when they get there? Are there places to eat? Will they be able to eat the food or is it dangerous? Maybe they could try Willy Wonka's everlasting gobstoppers or have a picnic with The Famous Five?
- **People** - Who might they see when they are there? Maybe they'll meet some hobbits, or Tom Gates or Mabel Jones! Think about the characters in the book and think about what kinds of people or creatures live in the story world you are focusing on.

Once you have completed your Visitors Guide, share it with a family member and ask them for their feedback. Does your leaflet make your story setting sound exciting to visit? Would they like to go? Which part do they think sounds the most interesting?

Numeracy and Mathematics – Displaying Data

In this activity, you will look at the different ways to display data. The type of graph selected and the way it is used to display data can sometimes make a data misleading. This YouTube video explains [how to spot a misleading graph](#).

After watching the video clip, have a look at the results below from a class survey. The teacher sent out a survey to a class asking them about their favourite school activities. The results from this survey have been presented in two different ways. One is displayed as a pie chart, and the other as a bar graph. Talk to an adult about how the data is displayed in each of the examples below.

Do you think this pie chart displays the survey results clearly? Are you able to compare the results to work out the most and least favourite activity? What would make this pie chart easier to read?

Are there any changes that you would make to improve the pie chart and graph? Discuss your suggestions with an adult to see if they agree.

Do you think this bar graph displays the survey results accurately? Is this a fair scale to have used? What happens to the results when you use a different scale?

Create your own display of the survey results to display the data clearly and accurately. Share your work with someone at home and ask for their thoughts about whether the data is displayed clearly and accurately.

Week 3 Home Learning for 2nd level – Block C

	1	2	3	4	5	6
A	Were there any tasks today that I found too easy? Why? Could I have added my own challenge?	Were there any tasks today that I found too difficult? What made it difficult? Did I give up straight away or keep trying?	Did I estimate correctly how long each task would take? If not did I under estimate or overestimate?	Did I work through tasks in a specific order? Did I start with the easiest task, or the hardest, or the most interesting or the most fun?	Did I try going back to a tricky task later and reading it again? Did it make a difference?	Did any of yesterday's tasks make more sense today now that my brain has had time away from it?
B	Which parts of today's tasks used knowledge I felt confident about remembering?	Which tasks had new learning in them? What did I learn?	Thinking of one of my tasks. Did I understand the concept that I was working on?	Did I find it easy to stay on task today? What helped/hindered this? Is it different depending on the task?	Can I think of ways to improve my motivation for tomorrow?	Do I need to practise anything to make tomorrow's learning easier?
C	Did I have everything I needed to complete the tasks? Did I use anything to help me?	Did I get stuck? How did I get past that? Did I give up or try something else? What did I try?	What made my learning stick today? What did I do that helped me understand a particular task?	How can I make sure I remember what I learned? What have I done in the past that has worked?	How long do I think I will remember what I learned? How could I check next week, next month?	Am I unsure or muddled about anything after today's work? What can I do to become clearer or more sure?

Thinking about how you learn can help you learn more effectively.

At the end of a day of learning you might like to choose a row (A, B or C) and roll a die to select 2 or 3 questions to think about.

You can think about them by yourself or, even better, discuss them with someone else.
